Senior UI Developer

LinkedIn · Git · SO · kevin@kevinboucher.com

Senior UI Developer with 20+ years of experience leading development teams and delivering high-impact web applications. Proven track record of improving code quality, implementing development processes, and mentoring junior developers across Ember, React, and Angular ecosystems. Expertise in transforming complex requirements into intuitive user experiences.

Experience

Senior Frontend Developer

Asurvio, LP

9/2023—present

Provided UI development leadership for a suite of consumer tech-related software products utilizing React.

- Led UI development of greenfield web security application from concept to production launch, handling complex messaging protocols between a web UI, associated browser extension, and a desktop agent
- Developed feature-rich Chromium browser extension integrating with a web security platform, handling real-time threat detection workflows
- Established a comprehensive UI component library and style guides, enabling consistent user experience across the product suite
- Collaborated on development process improvements, code quality, and user experience

---

Lead Software Developer

Identity Automation

10/2018—3/2023

Led a cross-functional team of 5-7 developers delivering mission-critical IAM applications used by educational institutions and enterprises.

- Architected and executed a large-scale UI refactoring initiative, modernizing the legacy codebase and establishing development best practices
- Drove adoption of automated testing and code quality processes, creating more reliable and maintainable applications
- Mentored junior developers
- Administered Git/GitLab repos & CI/CD

Sr. UI Developer
Xtivia
5/2017—10/2018

Senior UI developer focused on delivering themes and Angular/React single-page JavaScript applications in a Liferay CMS environment.

- Authored themes for Liferay CMS
- Delivered an Angular-based customer service management knowledge base for BCBS Alabama
- Refactored and improved a JavaScript-based hearing test application for Amplifon USA
- Mentored junior developers
- Implemented front-end development processes
- Administered Git repos

Developer IV
Q2
11/2013—2/2017

Led two teams of three developers, a QA engineer, and UX designers for the Q2 eBanking Platform and the Q2 SMART targeting and messaging platform.

- Authored single-page JavaScript applications
- Built a middle-tier API layer for a big data project
- Developed PostgreSQL data layer
- Administered Git repos

UX Designer/ Developer
Texas.gov
4/2012—9/2013

Designed & developed The Official Website of the State of Texas, which won one interactive award and was a finalist in another in 2013.

- Built a WordPress-based UX Style Guide
- Delivered SharePoint web parts to replace existing static HTML content on the Texas.gov portal
- Mentored UX interns

UI Engineer
Incisent Technologies
10/2009—3/2012

Engineered front-end architecture and delivered and supported a web-based automotive retail online marketing software package.

Web Developer
SolarWinds
3/2009—9/2009

Contracted through Modis IT to provide web development support for SolarWinds' corporate website.

Software Engineer
Nets To Ladders
10/2006—3/2009

Performed ASP.NET web forms development in a Microsoft CRM-based web application and the design & development of consumer-facing websites and tools.

Front-End Developer
Tipping Point
10/2005—5/2007

Contracted through Modis IT to redesign and rebuild the web-based interface for Tipping Point's embedded browser-based hardware management application.

Front-End Developer
Builder Homesite
4/2004—9/2005

Initially hired as a contractor to produce the front-end code for the Envision suite of applications, which led to a position as the principal front-end developer.

Web Developer
Lombardi Software
6/2000—8/2002

Designed, developed, and administered the Lombardi Software corporate website, intranet, and corporate web applications.
